

### SCHEDULE NO. 4

#### BACKFLOW PREVENTION ASSEMBLIES INSTALLATION PROGRAM

**Purpose:** The Utility requires an approved double check valve assembly (DCVA) or a reduced-pressure backflow assembly (RPBA) be installed in the meter box on all service connections.

**Available:** To customers of the Utility in Crooked River Ranch, Oregon, and vicinity.

**Applicable:** To residential and commercial/industrial premises.

**Requirements:**

- 1) Oregon Administrative Rules (OAR) Chapter 333, Division 061, administered by the Oregon Health Authority, Drinking Water Section (DWS) require the Utility to develop and implement a Cross Connection Control Program (Program).
- 2) The Utility's Program requires a DCVA or RPBA (collectively referred to as device) be installed in the meter box on all service connections by the Utility or an employee contracted by the Utility. Any device installed by someone other than the Utility after April 10, 2013, will not qualify for the program outlined in section 8 of schedule No. 4 and the Utility will install a device in the meter box and assess the customer a reasonable, at-cost amount for the device and installation. A RPBA must be installed on property where there is a health hazard per OAR 333-061-0020.
- 3) The Utility will develop a plan to install an appropriate device in all meter boxes.
- 4) The Utility will publish notice of its installation plan and updates in its newsletter.
- 5) The customer will be assessed an "at-cost" charge for the device and installation.
- 6) The Utility will notify customers in writing 30 calendar days prior to installation of the device. The notice will include the estimated cost and advise tenants to contact their landlord regarding payment.

Issue Date / Filing Date	April 6, 2015	Effective for Service on or after	May 23, 2015
Issued By Utility	Crooked River Ranch Water Company		

Crooked River Ranch Water Company

- 7) The Utility will be responsible for the annual testing, maintenance, repair, and replacement of all the Utility-owned devices. The customer will not be billed for these services.
- 8) Property owners that have an approved device installed at the meter and is testable as per the Utility’s Cross Connection Control Program, may transfer ownership of the device to the Utility on January 1, 2014. At that time, the Utility will assume ownership and all responsibility for testing, maintenance, repair, and replacement at no cost. If the property owner has a backflow device that is not approved by the Utility or is not testable, the property owner will be required to make any changes needed at their cost before the Utility will assume ownership of the device. Otherwise, the Utility will install a device in the meter box and assess the customer a reasonable, at-cost amount for the device and installation.
- 9) When property is sold, if an approved device is not installed in the meter box, the Utility will install an approved device in the meter box and charge the new customer for the device and installation. This applies even if a pervious property owner participated in Section 8 of Schedule 4.

Issue Date / Filing Date	April 6, 2015	Effective for Service on or after	May 23, 2015
Issued By Utility	Crooked River Ranch Water Company
